# Plants Details

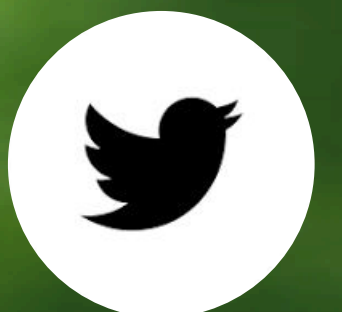

1. Water: Water 1-2 times a week, when the soil gets dry.
2. Sunlight: Keep in indirect or medium sunlight. Protect from strong sunlight.
3. Fertilizer: Give organic fertilizer once a month.
4. Cleaning of leaves: Clean the leaves with a wet cloth from time to time.
5. Cutting: If the growth becomes too much, then a new plant can be grown by cutting it.

# How to works

Three step layout with icons or illustrations:

Step 1: Upload a clear photo of a plant.

Step 2: AI identifies the image and provides the plant's & name.

🌿 Step 3: Get care tips, watering schedule, and sunlight needs.
